2019上海交通大学全球高校海外教育展 SJTU STUDY ABROAD FAIR

WORKSHOP THEME

Time: October 24th 2019

Location: Xuhui Campus, No. 1954 Huashan Road, Shanghai Jiao Tong University

Theme: Enhancing Support Measures for Overseas Students

Sub-theme 1: Study Abroad

Universities across the world have been scaling up overseas learning programs, with departments across the campus being active organizers of these programs. These programs require a high level of planning and management of risks, including security and medical risks. In terms of risk mitigation and effective crisis management protocols, what are mechanisms that home institutions have adopted to ensure well-planned study-abroad programs and what are the challenges they face?

Sub-theme 2: International students service

Cultural tolerance and diversity are valued in many universities. As universities have more and more international students from all around the world, how do universities help international students integrate into the local lives and get on with the local students? And how to deal with the crisis and challenges there? What the service your university provide to the International Students?

Sub-theme 3: Experience and Practice

With the further of internationalization, universities are actively creating various forms of learning programs to attract the overseas students. How to design attractive study programs? Does your home university has any attractive study programs, such as research internship programs, university-enterprise cooperation programs? Share with others about the experience and practice.

We have 3 sub-theme panel discussions. Participants who want to share the experience and challenges of your home university can conduct a 15-minute presentation on one of the workshop sub-themes. Each session will have 3-4 presenters.
